

RoboCup Rescue Doorways

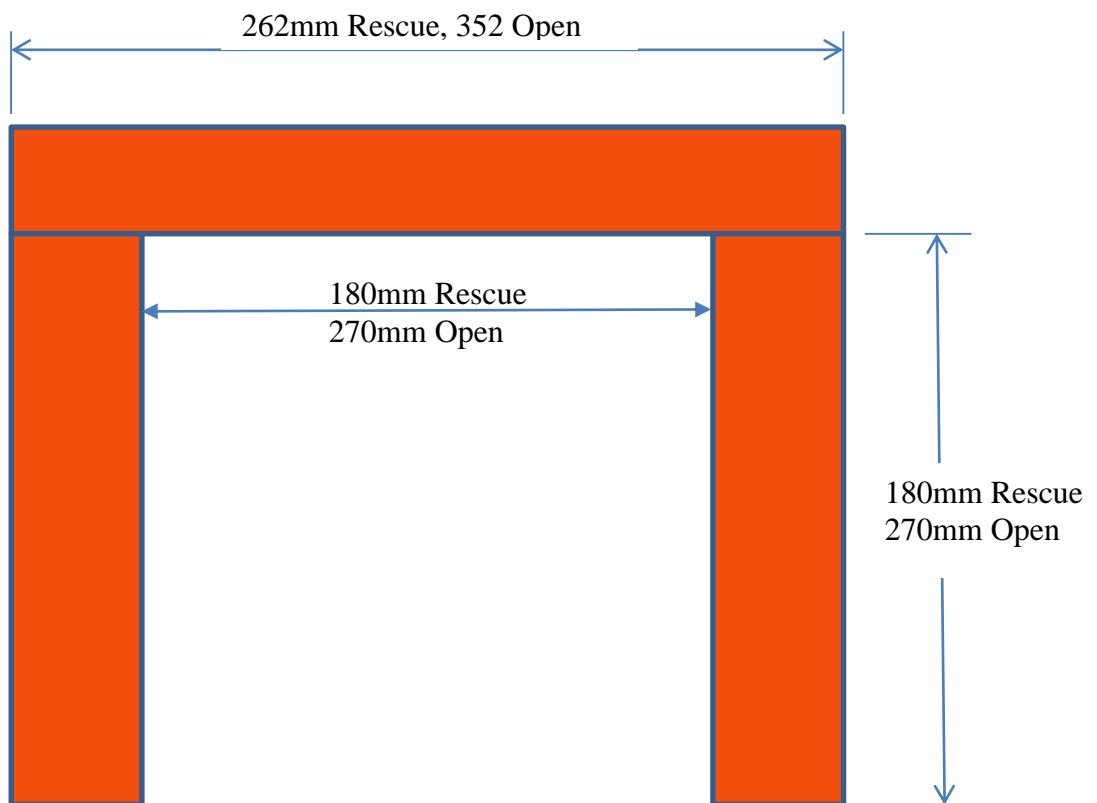

RoboCup Rescue requires robots to pass through a doorway without knocking it over. There are two different sizes, one for Rescue and one for Open Rescue

RESCUE

Materials: 1 piece of 41mm x 41mm x 262mm pine (or equivalent)
2 pieces of 41mm x 41mm x 180mm pin (or equivalent)

Open Rescue

Materials: 1 piece of 41mm x 41mm x 352mm pine (or equivalent)
2 pieces of 41mm x 41mm x 270mm pine (or equivalent)

NOTE: The most important aspect of the Doorway Construction is that the openings are 180 x 180mm for Rescue and 270 x 270mm for Open Rescue
