

## RoboCup Junior Dance Interview Questionnaire

Students are requested to complete this questionnaire prior to the event and submit it the Dance Coordinators in the marshalling area before your scheduled performance. A print out of your program should be attached along with a **log book**, diagrams, photos, journal entries, etc. to support your explanations. Although this will not be marked, in the case of a tied performance result, it will be used to decide the place getters.

Team Name:

School:

Challenge entered:

**Junior Dance**

**Senior Dance**

Performance

Theatre

List team members and write their roles within the team (builder, programmer, leader)

Robot name/s

What music have you used and why?

What part of the construction of the robot/s are you particularly pleased about?

What programming language have you used?

--

What was the hardest part of the programming to master?

Where did you get your ideas?

Which parts did your teacher/mentor have to guide you in?

What aspects of robotics have you learnt most about?

What aspects of working with others have you learnt most about?

Write a brief description of your performance

The information provided on the questionnaire is true and correct. The work on the robots is essentially the work of the team members signed below
